	Document number	Aetna-1435

UPDATE: Targeted Case Management Care Plans (T2023)

Aetna Better Health of Kentucky would like to provide an update regarding the expectations regarding Targeted Case Management (T2023) care plans.

The following education reflects updated guidance from the Department for Medicaid Services, Behavioral Health Division of Policy & Operations.

- **Targeted case management services covered under the below administrative regulations shall include the development and periodic revision of a specific TCM care plan for the recipient.**
 - After it has been identified that there is a need for Targeted Case Management services, the Targeted Case Manager must perform a Targeted Case Management assessment and develop a **specific Targeted Case Management care plan** to address the identified medical, social, educational, or other needs identified in the Targeted Case Management assessment or re-assessment.
 - The Targeted Case Management care plan should contain specific Targeted Case Management goals and measurable objectives detailing the specific course of action to respond to the assessed needs of the recipients.
 - There should also be reasonable timelines identified for when they expect to accomplish these objectives.
- **Is a separate specific Targeted Case Management care plan required, or may Targeted Case Management services be added to the recipient's overall plan of care?**
 - **UPDATE:** At a minimum, to meet regulatory requirements, there should be a section on a recipient's all-inclusive person-centered treatment plan that is specific to TCM goals and actions developed by the Targeted Case Manager, the recipient and others involved in their care.
 - It is also appropriate for providers to have a separate specific TCM care plan.

For complete coverage provisions, reimbursement provisions and requirements regarding Targeted Case Management, see the below Kentucky Administrative Regulations.

907 KAR 15:040. Coverage provisions and requirements regarding targeted case management for individuals with a substance use disorder.
