Dear Provider Partner,

Here at Aetna Better of Health of Michigan, we believe that your behavioral health is just as important as your physical health. According to the National Institute of Health, having continuity of care allows us to provide effective care, improve the provider-patient relationship, and most importantly, it results in improved clinical outcomes.

In our efforts to reconcile behavioral and physical health, ABHMI participates in on-going collaboration and data sharing meetings with our local Community Mental Health partners and PIHP's. The nurses and behavioral health specialist involved in these meetings are integral to its success. To continually improve continuity of care, we are proposing an additional component for PCP involvement.

ABHMI is working to develop a web-based portal, to allow for the primary care provider to view the psychotropic medications that their patients have been prescribed. In accordance with the Michigan Mental Health Code, a select few of the medication will be redacted.

You have been identified as a provider partner who could offer great contributions to the success of this program. If you are interested in being granted access to this portal, please complete the attached sFTP request form, and fax back to 860-900-7706.

Should you choose not to apply for portal access, you will have the option to request the information be mailed to you, once the program is initiated.

We thank you for your continued partnership and participation, as we work to encourage health and wellness in our communities.

Sincerely,
Aetna Better Health of Michigan
Behavioral Health Committee
