

## **Oral Health in Children**

Primary Care Providers (PCP) play a critical role in their patient's dental health and early dental care will establish a lifetime of good oral habits.

Aetna Better Health® of New Jersey is conducting a survey among our Providers to understand how their procedures for Oral Health in Children are conducted in their office.

Your input will help us enhance our services and support the Health Plan by improving utilization of annual dental visits for your office.

You can use the QR code below or you can access this survey at:
