

Schedule well-child visits by calendar year

Providers do not need to wait 366 days between eligible well-child visits for payment.

Eligible members who received a well-child visit during one calendar year may receive another eligible well-child visit during the next calendar year. **The visits do not have to be at least 366 days apart.**

Child and adolescent well-care visits

The child and adolescent well-care visit measure includes members ages three through 21 who receive at least one comprehensive exam with a primary care provider or OB-GYN practitioner during the calendar year.

The visit may be completed by an eligible primary care provider or OB-GYN practitioner. The practitioner does not have to be the provider assigned to the member.

Make the most of each visit

Well-child visits are an opportunity to address other important preventive care needs, including immunizations and nutrition counseling.
