What is the Aetna Better Health Kids Formulary?

This is a drug list created by Aetna Better Health Kids. We will cover drugs on this list. Some drugs may have coverage rules. If the rules for that drug are met, we will cover the drug. Drugs must also be filled at an in-network pharmacy.

This list is for drugs covered under your prescription benefit. Drugs may not be listed here if they are covered under your medical benefit. Drugs covered under your medical benefit are usually those a health care professional gives to you, like an IV infusion or other injection, and not typically a medication you would take on your own.

Are there any exclusions from the formulary?

Yes, some drugs are excluded from coverage by direction of the Pennsylvania Department of Human Services (DHS). Examples include:

- Drugs and devices classified as experimental by the FDA or whose use is classified as experimental by the FDA
- Drugs and devices not approved by the FDA or whose use is not approved by the FDA
- Drugs and other items prescribed for obesity or appetite control
- Drugs designated as a DESI (Drug Efficacy Study Implementation). A DESI drug is one that was approved by the FDA solely on the basis of their safety prior to 1962. Subsequent to 1962, Congress required drugs to be shown to be effective as well. As a result, the FDA initiated a DESI to evaluate the effectiveness of medications previously approved based on safety alone. DESI drugs may continue to be marketed until proceedings evaluating efficacy have been concluded, at which point continued marketing would only be permitted if a New Drug Application is submitted for those drugs.
- Durable Medical Equipment (DME) items (with the exception of preferred diabetic supplies, syringes, lancets, alcohol wipes and condoms)
- Items prescribed or ordered by a physician who has been barred or suspended from participating in the Medical Assistance Program
- Pharmaceutical services provided to a hospitalized person
- Placebos

Can our drug list change?

We may add or remove drugs on the list. All drug removals from the formulary will be sent to the state for review at least 30 days before the change is made. Utilizing members will be notified at least 30 days before a drug is removed from the formulary. All changes to the formulary will be posted on the plan's website.

How do I use the formulary?

- **Column #1:** lists the covered drug. Brand drugs are in upper case letters (e.g., DRUG). Generics are in lower case letters (e.g., drug).
- **Column #2:** lists the brand name of the drug when a generic is covered
- **Column #3:** shows coverage rules for the drug

Drugs are also grouped by the type of condition they treat. Drugs used to treat an earache are listed under the section, "OTIC." If you know what your drug is used for, please look for that section name on the drug list. Then look under that section for your drug.

What are generic drugs?

Generic drugs are copies of brand-name drugs. They are the same as those brand name drugs in dosage form, safety, strength, route of administration, quality, and intended use.

When a drug is available as a generic, you will be required to use the generic version for your prescription. If your provider feels it is medically necessary that you take only the brand, then your provider must request a prior authorization from Aetna Better Health Kids before the brand will be covered.

Are Over-The-Counter (OTC) drugs covered?

We will cover OTC drugs on the formulary. Some OTC drugs may have coverage rules. If the rules for that OTC drug are met, then we will cover the OTC drug. Like other drugs, OTC drugs need a prescription from a doctor if they are to be covered by the Aetna Better Health Kids.

How much will I pay for covered drugs?

No Copays

There are no copays for:

- Children under 21 years of age
- Members in a nursing home or other facility (Intermediate Care Facility for Mental Retardation)
- Family planning drugs
- Emergency situation (condition in which emergency medical care is needed to prevent death or serious injury of a member)
- Certain drug groups listed below do not have copays. For those drug groups that will not require a copay the drug group will be marked with a “no copay” on the formulary.
 - Anti-glaucoma drugs
 - Anti-Parkinson drugs
 - Antipsychotic drugs (except for those anti-anxiety drugs that are controlled substances, like alprazolam or diazepam)
 - Cancer drugs
 - Diabetes drugs
 - Drugs used only to treat HIV/AIDS
 - Epilepsy drugs
 - Heart disease drugs
 - High blood pressure drugs
 - Naloxone injection/nasal spray for drug overdose
 - Preventative vaccines

What are some types of coverage rules?

- **Prior Approval (PA):** This means your doctor will need to get approval from the plan first before the drug can be filled at the pharmacy. If it is not approved, We will not cover the drug.
- **Quantity Level Limits (QLL):** This means there is a limit on the amount of drug the plan will cover. For example, we provide 60 pills in 30 days for some drugs. Your doctor will need to get approval from Aetna Better Health Kids first before the drug can be filled for more than your benefit limits.
- **Step Therapy (ST):** This means you may need to try certain drugs first to treat your condition.
 - After the first drug is tried, we will then cover the other drug for that same condition. For example, Drug A and Drug B may treat your condition. We may not cover Drug B unless you try Drug A first. If Drug A does not work for you or you cannot take Drug A, then Drug B will be covered.

What if my drug is not on the plan's Formulary?

First, please call your doctor and ask if your drug is on the formulary. If the drug is not listed on the formulary then:

- Ask your doctor for a similar drug that is on the formulary, or
- Your doctor can ask the us to cover your drug through the prior approval process.

Where can I fill my prescriptions?

You can fill your prescriptions at any network pharmacy. You can find the location of an in-network pharmacy by visiting the CVS Caremark pharmacy locator.

<http://www.aetnabetterhealth.com/pennsylvania/providers/pharmacy>

This allows you to search for a pharmacy by zip code so you can find a location close to you.
