Intent:

The intent of this policy/guideline is to provide information to the prescribing practitioner outlining the coverage criteria for Adbry under the patient's prescription drug benefit.

Description:

The indications below including FDA-approved indications and compendial uses are considered a covered benefit provided that all the approval criteria are met and the member has no exclusions to the prescribed therapy.

FDA-Approved Indication

Indicated for the treatment of moderate-to-severe atopic dermatitis in adult patients whose disease is not adequately controlled with topical prescription therapies or when those therapies are not advisable. Adbry can be used with or without topical corticosteroids.

All other indications are considered experimental/investigational and not medically necessary.

Applicable Drug List:

Adbry

Policy/Guideline:

Documentation for all indications:

The patient is unable to take Dupixent, where indicated, for the given diagnosis due to a trial and inadequate treatment response or intolerance, or a contraindication. Documentation is required for approval.

Documentation:

Submission of the following information is necessary to initiate the prior authorization review:

- A. For initial requests:
 - 1. Member's chart notes or medical records showing affected area(s) and body surface area (where applicable).
 - 2. Member's chart notes, medical record documentation, or claims history of prerequisite therapies including response to therapy. If prerequisite therapies are not advisable, documentation of why therapy is not advisable for the member.
- B. For continuation requests: Documentation (e.g., chart notes) that the member has experienced a positive clinical response to therapy as evidenced by low disease activity or improvement in signs or symptoms of atopic dermatitis.

Prescriber Specialties:

This medication must be prescribed by or in consultation with a dermatologist or allergist/immunologist.

Criteria for Initial Approval:

Atopic dermatitis

Authorization of 4 months may be granted for treatment of moderate-to-severe atopic dermatitis in members 18 years of age or older when all of the following criteria are met:

- A. Affected body surface is greater than or equal to 10% body surface area OR crucial body areas (e.g., hands, feet, face, neck, scalp, genitals/groin, intertriginous areas) are affected.
- B. Member meets one of the following:
 - 1. Member has had an inadequate treatment response with one of the following in the past year:
 - i. A medium potency to super-high potency topical corticosteroid (see Appendix)
 - ii. A topical calcineurin inhibitor
 - 2. The use of medium potency to super-high potency topical corticosteroid and topical calcineurin inhibitor are not advisable for the member (e.g., due to contraindications, prior intolerances).

Criteria for Continuation of Therapy:

Atopic dermatitis

Authorization of 12 months may be granted for members 18 years of age or older (including new members) who are using the requested medication for moderate-to-severe atopic dermatitis when the member has achieved or maintained a positive clinical response as evidenced by low disease activity (i.e., clear or almost clear skin), or improvement in signs and symptoms of atopic dermatitis (e.g., redness, itching, oozing/crusting).

Note: Member cannot use Adbry concomitantly with any other biologic drug or targeted synthetic drug.

Approval Duration and Quantity Restrictions:

Approval:

Initial: 4 monthsRenewal: 12 months
