AETNA BE							
Coverage Policy/Guideline							
Name: VA Non-formula		lary and QLL	Page:	1 of 2			
Effective Date: 12/5/2024			Last Review Date:	11/2024			
Applies to:	□Illinois	□Florida	□New Jersey				
	□Maryland	□Florida Kids	□Pennsylvania Kids				
	□Michigan	⊠Virginia	☐Kentucky PRMD				

Intent:

The intent of this policy/guideline is to provide information to the prescribing practitioner outlining the coverage criteria for medications utilizing the VA Non-formulary and QLL Criteria under the patient's prescription drug benefit.

Description:

The intent of the criteria is to ensure that patients follow selection elements noted in labeling and/or practice guidelines to ensure appropriate utilization.

Applicable Drug List:

Reference Formulary

Policy/Guideline:

Note: This criteria should be utilized for non-formulary drugs medications that are also not present on the Virginia state preferred drug list.

The requested drug will be covered with prior authorization when the following criteria are met:

 The requested product is not being prescribed for an indication that is recognized as an excluded benefit by the applicable health plan's program (e.g., weight loss, erectile dysfunction, fertility, cosmetic, hair loss, medical foods)

AND

- The request is for a formulary product for more than the initial limit
 OR
- The patient is unable to take the required number of formulary alternatives (3) for the given diagnosis due to a trial and inadequate treatment response or intolerance, or a contraindication. Documentation is required for approval

AND

- o If the request is for a combination product for which individual components are available at similar doses on formulary, then the patient must have had a trial and failure of the separate individual components due to an adverse event (examples: rash, nausea, vomiting, anaphylaxis) that is thought to be due to an inactive ingredient, AND
- If the request is for a brand name product that has a generic available on formulary, then the patient must have had a trial and failure of the generic agent due to an adverse event (examples: rash, nausea, vomiting, anaphylaxis) that is thought to be due to an inactive ingredient, AND
- If the request is for a product with an available alternative dosage form for the same active ingredient on formulary, then there must be a clinical reason why
