Introducing Aetna® Prior Authorization Oncology Bundles

Aetna® Dual Eligible Special Needs Plans Prior Authorization (PA) Oncology Bundles enables providers to request oncology and imaging services together on Eviti Connect®, streamlining the existing process and eliminating the need for separate submissions.

How PA oncology bundles work

Bundling creates **a more streamlined authorization experience** when you submit PA requests for oncology treatment and imaging services together. When eligible, requests are automated, reducing administrative burden and improving provider and patient experiences.

Key benefits

- **Simplified workflow for providers** through a single care plan submission.
- **Faster access to treatment** for patients.
- **Automated and expedited approvals** using evidence-based guidelines.
- **Fewer separate authorization requests** to manage.
- **Reduced data entry** across submissions.

Getting started is simple

- No new peer requirements are required.
- Providers will use the **Eviti Connect** portal for all oncology and imaging requests.
- Aetna retains PA decisioning.

Consider bundling imaging when you

- Know the patient's imaging needs at the time of treatment planning.
- Anticipate recurring scans during the patient's treatment.
- Expect the patient to receive imaging over an extended period (e.g., up to a year from the date you initiate the treatment plan).

Services included in the bundle

You may request to include imaging services with any cancer treatment plan, such as:

- Computed tomography (CT)
- Positron emission tomography (PET)
- Single photon emission computed tomography (SPECT)
- Magnetic resonance imaging (MRI)

Who should take action?	What to do
Oncology providers	Consider imaging needs during treatment planning, when appropriate.
Oncology authorization teams	Include imaging when submitting treatment plans, when available.
Imaging authorization teams	Log in to Eviti Connect and add imaging from saved treatment plans.
Practice managers	Share this update with the appropriate team and confirm Eviti Connect access is enabled.

Training and quick guide resources

Use the resources below to learn more about how imaging can be included with oncology treatment plan requests in Eviti.

- **Quick guide** How to include imaging with a treatment plan
- **Live training sessions** 30-minute instructor-led training options
- **Recorded training** 5-minute how-to add imaging video
- **Register for Eviti Connect** to submit and manage oncology bundle requests.

When imaging is needed, include it with the oncology request.
One submission can reduce duplicate work and support timely patient care!

For more information

- About PA Oncology Bundles, contact provider services **1-855-463-0933**
- For training on how to submit PA Oncology Bundles on Eviti Connect, **contact the NantHealth Training Team**.
